

# Rex-Royal S500 MCST-CF

## Rex-Royal S500 MCST-CF

With the Rex-Royal CompactFoam milk system you can automatically produce the perfect milk foam in the desired consistency as cold or warm milk foam. The 10-litre cooling unit can be installed next to or under the counter depending on space availability. If you want to steam fresh milk yourself like a barista, you can control the steam output yourself with the control knob and manually prepare milk specialties. As with all „M“ models in the CF-model range, all coffee and mixed drinks can be produced as double products at the push of a button. The CF model range can also optionally process two types of milk.

### Features

Fresh Milk

Coffee

Steam

Hot Water

Compact Foam

### Advantages

- With the Rex-Royal CompactFoam System you will be able to realise very compact and creamy warm or cold milk foam.
- Two integrated instant containers for creamy, delicate chocolate or vanilla creations or even coffee and chocolate mixed drinks.
- The integrated hot water and steam systems have an hourly output of up to 58 litres and as a result fulfils the highest time and capacity requirements.
- Efficient steam wand with optimized steam nozzle for the easy preparation of hot milk or the finest milk foam
- With the optional BaristaSteam or efficient PowerSteam, milk can be automatically steamed as if a wizard is working his magic.
- Separate, efficient boilers for the preparation of coffee, hot water and steam.
- Patented metal brewing unit with storage capacity of 23 grams of coffee powder.
- Equipped with two precise, quiet and powerful grinders as standard.
- Can be optionally equipped with a third grinder.
- Equipped with a crystal clear, 10.1-inch, video-compatible display as Standard.
- Intuitive and easy operation, for cup preselection layout.
- Various operating concepts.
- Machine can play advertising messages and videos on the touchscreen. Easy upload via USB connection.
