

Rex-Royal S500 MCSTI

Rex-Royal S500 MCSTI

With the instant version („I“) you widen the Rex-Royal S500 to an MCSTI. As a result it becomes a complete solution that leaves no desires unfulfilled. In addition to the perfect milk foam with regards to consistency and quality, you can also prepare chocolate/vanilla creations or even coffee and chocolate mixed drinks with the two integrated instant containers. Enjoy all these drinks at the push of a button. With a hot water output of up to 58 litres per hour, the S500 is also unique in this aspect. Equipped as standard with two precise grinders, all S500 models can be optionally equipped with a third.

Features

Fresh Milk

Coffee

Steam

Hot Water

Instant Products

Advantages

- With help of the Rex-Royal milk system with gear pump you will be able to control the milk temperature individually and produce a creamy milk foam.
- Two integrated instant containers for creamy, delicate chocolate or vanilla creations or even coffee and chocolate mixed drinks.
- The integrated hot water/steam system has an hourly output of up to 58 litres and as a result fulfils the highest time and capacity requirements.
- Efficient steam wand with optimized steam nozzle for the easy preparation of hot milk or the finest milk foam
- With the optional BaristaSteam or efficient PowerSteam, milk can be automatically steamed as if a wizard is working his magic.
- Separate, efficient boilers for the preparation of coffee, hot water and steam.
- Patented metal brewing unit with storage capacity of 23 grams of coffee powder.
- Equipped with two precise, quiet and powerful grinders as standard.
- Equipped with a crystal clear, 10.1-inch, video-compatible display as Standard.
- Intuitive and easy operation, for cup preselection or in self-service layout.
- Various operating concepts.
- Machine can play advertising messages and be updated via USB Connection.
