

Rex-Royal S500 MCT-CF

Rex-Royal S500 MCT-CF

With the Rex-Royal CompactFoam (CF) milk system you can get the perfect steamed milk in the desired consistency, as well as cold or warm milk foam. The patented Rex-Royal metal brewing unit, which holds up to 23 grams of coffee grounds, provides consistent and high-quality coffee. All coffee and mixed drinks, from a hot espresso, latte, americano to a layered latte macchiato, fine-pored cappuccino, barista foam and many more can also be obtained as double products. If required, the CF variant can also process two types of milk.

Features

Fresh Milk

Coffee

Hot Water

Compact Foam

Advantages

- With the Rex-Royal CompactFoam System you will be able to realise very compact and creamy warm or cold milk foam.
- The integrated hot water/steam system has an hourly output of up to 58 litres and as a result fulfils the highest time and capacity requirements.
- Separate, efficient boilers for the preparation of coffee, hot water/steam.
- Patented metal brewing unit with storage capacity of 23 grams of coffee powder.
- Consistent, high-quality production of single and double products.
- Equipped with two precise, quiet and powerful grinders as standard.
- Can be optionally equipped with a third grinder.
- Equipped with a crystal clear, 10.1-inch, video-compatible display as Standard.
- Intuitive and easy operation, whether for cup pre-selection or in self-service layout.
- Machine can play advertising messages and be updated via USB Connection.
